Australia's favourite outdoor blind

www.ziptrak.com.au

Transform your
entertainment
area in seconds

Instantly create a brand new space in your home, ready to entertain family and friends at a moment's notice

Offering protection during every season from UV, dust, wind and rain for year-round outdoor entertaining.

- Custom made for every installation
- Protection from the elements
- Effortless and easy-to-use
- Child-safe; no cords, ropes or wires
- Australian made and patented design

Enjoy your privacy without compromising the view

Enjoy a sense of privacy while preserving your external views with the use of modern Sunscreen Mesh fabrics. Or for uninterrupted views and maximum rain protection choose clear PVC with your Ziptrak® blind system.

- Engineered to work with Clear PVC and mesh fabrics
- Purpose Australian-made side and bottom splines
 - > Spline strength, durability, and robustness
- Maximum spline strength, durability, and robustness
- Sleek, slimline side tracks, to optimise your view
- Fantastic real world wind performance

Protect your investment

The Ziptrak® Streamline Pelmet, made of extruded aluminium, is engineered to withstand the toughest conditions. Its design protects the underlying system from the elements, ensuring the blinds will look great and operate flawlessly for years.

The Insect Control System is an exclusive feature of the Ziptrak® Streamline Pelmet. The internal brushes create an additional barrier stopping insect entry, that cannot be offered by other systems.

Pelmet and Bracket Options		Style	Material (cover)	Strength ¹	Insect Control	Dust Protection
Streamline Pelmet		Premium Fully Enclosed	Extruded Aluminium
Traditional Pelmet		Economy Enclosed	Folded Steel
Bracket with Back Flashing		No Hood with Back Cover	Folded Steel (Back Cover)	.	.	.
Bracket		No Hood				

Chart represents the Ziptrak® system with the blind in a lowered position (closed). **1 Strength:** The extrusion process creates inhered strength and rigidity to the pelmet, its solid structure resists deformation and vibration caused by wind.

INSECT
CONTROL

MANUAL OR
ELECTRIC OPERATION

SMOOTH
TRACK-GUIDED
OPERATION

Effortless smooth operation

Ziptrak® Spring-Balanced technology permits effortless smooth operation. Simply push the blind up or pull the blind down and your Ziptrak® blind will stay where you leave it. You can also lock your blind into place by pushing down into the lowest position and engaging the Ziptrak® Centre-Lock-Release mechanism. To unlock, lift the handle to activate the release latches and lift.

Optional motorisation is also available, with remote control instead of manual operation, useful for multiple blind applications or installations in hard to reach locations like outside of windows or at heights.

Spring-Balanced Technology

- One-touch convenience
- Quick and easy-to-use
- Leave at any height
- Australian made

Designed for all the family

The Ziptrak® patented Track-Guided Blind System, with its unique and robust side spline, creates a gapless barrier on all sides of each blind – keeping out dust, wind, rain and insects. Our design also presents a safe environment for children and pets, with no cords, crank handles, zips or external wiring.

DESIGN YOUR BLIND

1 Made to order sizing

Each Ziptrak® blind is custom made and installed to your individual needs and specifications. With a wide variety of colour options, styles and features available to match or complement your outdoor space.

Need a larger blind or would like to include a doorway? Ask your retailer about the Ziptrak® Removable Post System.

Try our **3D Design Your Blind** configurator

2 Select the skin type

OR

*Sunscreen Mesh - Privacy and Protection

Provides a high degree of privacy, reduces sun glare, and allows airflow. For year-round protection from the harsh weather - with up to 99% UV and 96% full wind block.

*Clear PVC - Uninterrupted Views

Allows for maximum views and rain protection. Keeps the warmth in during winter while blocking up to 93% UV.

3 Select the hardware colour

White®

Classic Cream®

Paperbark®

Black®

Woodland Grey®

Monument®

Surfmist®

NEW

Choose your own custom colour

Ziptrak® aluminium componentry is readily available in seven colours or can be powder-coated to any conceivable colour to match the decor of your existing outdoor area.

¹ The recommended maximum dimensions for Ziptrak® blinds are 6000mm wide by 3500mm high when using Sunscreen Mesh, or 5500mm wide by 3500mm high when using clear PVC. * Sunscreen Mesh and PVC products are complementary to the Ziptrak® system but are not manufactured or sold by Ziptrak Pty Ltd. Please speak with your retailer about the range, warranty and technical specification of these products. We recommend making your selection after viewing actual product samples in your outdoor area. Varying light conditions and printing processes can affect colour tones represented in this catalogue.

DESIGN YOUR BLIND

4 Choose from the Pelmet or Bracket options

Streamline Pelmet with Insect Control System

Provides exceptional protection from the elements.

Traditional Pelmet

Conceals the blind when retracted.

Bracket with Back Flashing

Hides the blind from view on one side only.

Bracket

Holds the blind in place but leaves it unprotected from the elements.

For detailed information about the different Pelmet and Bracket options go to page 4

5 Choose from the Bottom Bar Weather Protection options

Standard Weather Strip (15 mm)

Provides superior weather protection while closing gaps effectively.

Large Weather Strip (30 mm)

Blocks weather and other debris when large gaps are present.

Extra Large Weather Strip (60mm)

Offers substantial flexibility to accommodate sloping floor conditions.

Custom-Made Skirt

For acutely sloping surfaces your retailer can offer a custom-made skirt.

6 Choose either manual (Spring-Balanced) or motorised operation

Centre-Lock-Release Mechanism (exclusive for manual operation)

Front Handle

Lock your blind in place when fully down (closed).

Reverse Handle

Add an extra handle to unlock the blind from the other side.

Pull Stick

Request a pull stick to avoid reaching up high or bending low to operate your outdoor blind.

Motorisation

Ask your local Retailer for details about convenient motorisation and SolarSmart™ options, only available with Sunscreen Mesh.

Important Information

UVR protection¹: The amount of UV Radiation that is transmitted through a fabric. Mesh fabrics can block up to 99% of UV Radiation depending on individual technical specifications. This is important when considering protection of outdoor flooring, furnishing fabrics and furniture against fading.

Privacy: The openness or proportion of holes in woven fabrics affects the degree of visibility. Dark colours may provide outgoing visibility with daytime privacy whereas light colours offer greater heat protection efficiency but with lower privacy.

Wind protection and engineering excellence²: Ziptrak® blinds are trusted by hundreds of thousands of Australian homes and businesses to provide an enjoyable outdoor living space. The strong and robust system is commonly installed throughout coastal regions and locations prone to high winds. Your Ziptrak® Blind's performance in wind is determined by its installation and fabric type. Rigorously tested by Ziptrak® Engineers, our 2.5m x 2.5m system can withstand wind speeds up to 84km/hr with aluminum rivets, 140km/hr using stainless steel rivets, and even exceeds 160km/hr with our specialised Extreme Conditions Installation method. All tests utilised Ziptrak®-approved installation methods and fixings. Please discuss your specific needs with your Ziptrak® Retailer.

Size and wind force: Larger blinds experience greater wind force, affecting their wind rating. Consult your retailer for tailored advice or visit our website.

Commercial and high wind applications: For commercial settings and wind-prone areas, we recommend our Extreme Conditions Installation method including using stainless steel rivets, ensuring unparalleled performance and durability. *Pressure on Sunscreen Mesh fabrics due to wind and rain conditions increase water penetration through these fabrics.

Safety measures: For optimal longevity, when expecting or experiencing very strong winds, a storm or a severe weather event, your Ziptrak® blinds should be fully retracted.

Additional products: While Sunscreen Mesh and PVC products complement our system, they are not manufactured by Ziptrak Pty Ltd. Specifications will vary; consult your retailer about the range, warranty, and specifications of these products. We recommend making final selections after viewing actual samples.
